Agenda as attached with this MoM were presented, discussed, deliberated upon and resolved as mentioned against each:

- 1) Agenda as mentioned in Annexure-I to this Minutes of the Meeting (MoM) were discussed and resolution as mentioned against each were arrived at.
- 2) A detailed discussion took place regarding Agenda Item No. 1 "Course Curriculum of Three-year of the Five-year Integrated B.A.-M.A. in Economics". It was discussed and finalised as attached-with as Annexure-II.
- 3) It has been pointed out by external members of the BOS that the Syllabus may be revised in the light of the discussion that took place in present BOS and be passed in the Next BoS for future batches of students.
- 4) It has also been pointed out that the Programme Outcome, Program Specific Outcome, Module-wise course outcome and Learning Outcome in different subjects must be included as per the requirements of the NAAC in accordance with NEP-2020.
- 5) It was also suggested that something on Indian Knowledge System be included in the relevant Course to make it in consonance with the requirement of the NEP-2020.
- 6) Suggestions were also made regarding the new pattern of coding as circulated by UGC. The BOS was appraised that the same is decided by the University and the necessary changes shall be incorporated as directed by the University from time to time.
- 7) Regarding Agenda Item No.2. All the members present agreed to approve the Course Curriculum of Ph.D. course work as attached-with since the same stands approved by Expert Committee earlier.

8) All the members present agreed upon and approved Agenda Item No. 3, 4, and 5 as mentioned in the Detailed Agenda.

7.4. Marham B

- 9) All the members present agreed upon and approved the Newly Enrolled Ph.D. research scholar Mr. Gautam Kumar for 2023 batch as mentioned in Agenda Item No.4.
- 10) Agenda Item No.5 'Approval of Ph.D. External examiner to evaluate the thesis of Ph.D. scholar Mr. Atul Anand Jha' have been approved my all the members present in the meeting.
- 11) Prof. Nayak suggested that the course mapping in respective semesters may be done in such manner that the same course could be Major for students of Economics and Minor for Students of other Departments who opt for it. This shall help reduce the workload burden of the Faculty.
- 12) The present course structure may be allowed to be adjusted according to the need of the University as per NEP-2020.
- Papers like Principles of Economics and Basic Mathematical 13) Economics as well as any other paper taught to First and second batch of students may be adjusted according to the need of the University.
- 14) Approval for any other matter related to Framing of Course Curriculum for UG-PG Program or restructuring of the same shall be solicited through circulation to Members of the BOS.
- Meeting ended with thanks to respective external members, internal 15) members and the Chair.

The details of the Curricula developed and implemented in the Departments of Economics and Development Studies that have relevance to the local, regional, national, and global developmental needs, which is reflected in the Programme outcomes (POs) and Course outcome of the Programmes offered by the University.

#### Programme Outcomes (POs) of the Ph.D. Economics

The Ph.D. programme in Economics offers a top-notch research setting including numerous study domains. It is mandatory for Ph.D. candidates to finish one semester of coursework prior to beginning their dissertation. The whole Curricula formulated in such a manner to incorporate the local, regional, national, and global developmental needs, which rightly reveal in the Programme Outcomes (POs). The curricula allow the students to apply their analytical knowledge of the topic to real-world economic experiences and to analyse changing processes from a historical standpoint. The study of development-related topics is given particular attention when considering the global, national and regional issues of Indian economy.

# Relevance to the local, regional, national, and global developmental needs, which is reflected in the Course outcomes of the programmes

The relevance of curricula to the local, regional, national, and global developmental needs have been incorporated in the course outcomes of Ph.D. programme. The courses provide a critical understanding of global, national and regional issues ant their dynamics, and planning complexities. A few exemplar courses are worth mentioning which directly focuses on the above relevance: Financial Economics (ECO911030), Monetary Economics (ECO911030), International Economics (ECO911030), Regional Development in India (ECO911030), Industrial Economics (ECO911040) and Agricultural Economics (ECO911040)

# **Course Curriculum**

1)	Type of Co	urse	Ph.D. Course Work
2)	Name of the		Research Methodology
3)	Course Cod		ECO911010
4)	Total Credi		04 (Four)
5)		Proposed by	Department of Economics and Development Studies(DEDS)
6)	Who can te	each this course	Faculty of the Department of Economics and Development Studies will teach the course.
7)	Overview		The aim of this subject is to acquaint the scholars of doctorate program with the research methods used in economics.
8)	Programmo	e/course objective	The aim of this subject is to acquaint the scholars of doctorate program with the research methods used in economics. The paper enables learners to develop a skill set that helps them to plan, design and prepare a research project. The course is based on enhancing the research acumen of learners as it incorporates theory and techniques required in research process.
9)	Course feat outcome	tures and learning	On successful completion of the module students will be able to:  Develop a conceptual understanding and foundation related to Research Methodology and its various approaches.  Identify and provide a logical reasoning in the formulation of research problem, and the problems involved in systematic explanation of phenomenon.  Develop Research Design based on multifarious approaches with quantitative techniques for economic data analysis.  The course will improve the probabilities of fetching employment as the courses will give a better understanding of statistical tools, research techniques and econometric modelling to analyse the data.
10)	Who can attend the course		This course is suitable for Research Scholars of Economics and Development Studies.
11)	Course requisite	Eligibility/Pre-	Ph.D. Students
12)	Course Duration:		One Semester
13)	Course Str	ucture	
(i)	Unit- I		ology: An Introduction – Meaning, Objectives, Types, arch Process, Criteria for Good Research.

		Defining Research Problem – what is a research problem, necessity of defining				
		research problem, techniques involved in defining a problem.				
(ii)	Unit-II	Research Design – Meaning, Need, Features of a Good design, different				
		research designs, basic principles.				
		Sampling Design – Census and sample survey, steps in sampling design,				
		different types of sample designs, Sampling theory.				
(iii)	Unit-III	Measurement and Scaling Techniques – Measurement in research,				
		measurement scales, scaling, important scaling techniques, scale construction				
		techniques.				
		<b>Data Sources and Methods of Data Collection</b> – Sources of Data – NSSO,				
		IMF, RBI, Government Bodies and other International Organizations,				
		Collection of primary data, observation method, interview method, collection of				
		data through questionnaires and schedules, collection of secondary data, case				
		study method.				
(iv)	Unit-IV	<b>Processing and Analysis of Data</b> – Processing operations, types of analysis,				
		use of statistics in research.				
(v)	Unit-V	<b>Hypothesis Testing</b> – What is hypothesis, procedure for hypothesis testing,				
		important parametric and non-parametric tests.				
		Statistical Testing – Parametric and Non-Parametric Tests (t-test, f-test, chi-				
		square test etc.)				
		Multivariate Analysis Techniques – Classification of multivariate techniques,				
( <b>!</b> )	TI24 T/T	important multivariate techniques.				
(vi)	Unit-VI	Computer Usage – Basics, Introduction to SPSS, and STATA and their				
		Application in Econometric Analysis  Interpretation and Report Writing – Why interpretation, techniques of				
		interpretation and <b>keport writing</b> – why interpretation, techniques of interpretation, significance of report writing, steps, and oral presentation

# Central University of Jharkhand School of Humanities and Social Sciences Department of Economics and Development Studies

# **Course Curriculum**

1)	Type of Course		Ph.D. Course Work	
2)	Name of the Course	e	Advanced Economic Theory	
3)	<b>Course Code:</b>		ECO911020	
4)	Total Credit:		04 (Four)	
5)	Floated by/Propose	ed by	Department of Economics and Development	
		-	Studies(DEDS)	
<b>6</b> )	Who can teach this	course	Faculty of the Department of Economics and	
			Development Studies will teach the course.	
<b>7</b> )	Overview		Advanced economic theory updates scholars with the	
			advanced topics in economics.	
8)	Programme/course	objective	To understand the role of risk, uncertainty, institutions,	
			endogenous growth in economics, concept of welfare.	
9)	Course features and	d learning	After completion of the course students will learn the	
	outcome		workings of uncertainty, risk, choice and preference in	
			decision-making process. They will also get	
			familiarized with the concepts of institutional	
			economics, new endogenous growth theories and	
			dynamic issues prevailing in economics.	
10)	Who can attend the	e course	This course is suitable for Research Scholars of	
			Economics and Development Studies.	
11)	Course Eligibility/Pre-		M.A. Economics	
	requisite			
12)	Course Duration:		One Semester	
13)	Course Structure	Τ		
(i)	Unit- I		es of Uncertainty: Expected Utility and Certainty	
		-	ce – Measures of Risk and Risk Aversion – Sensitivity	
			The Economics of Insurance	
		1	petitive Firm under Uncertainty – The Economics of	
			Elementary Search Models – adaptive Search –	
			es to the Expected Utility Hypotheses – The Competitive	
			nder Uncertainty – The Efficient Market Hypothesis.	
		New Institutional Economics: Ingredients of Non-Walrasian		
		Analysis – Transaction costs, Adverse Selection, Moral Hazard		
		Theorem	Agent Problem, Path dependency, Free Riders and Coase	
			on Cost Economics – Basic Propositions, Transaction	
			the Evolution of the firm, Property Rights – Transaction	
			d Exchange; The prospects for New Institutional	
		Economics	<del>-</del>	
	1	Leonomic	J	

		New Endogenous Growth Theorems: Paul Romer and Robert				
	Lucas; Outline of Intergenerational Economics and Experimental					
		Economics; The capability approach to welfare economics –				
		application to evolving HDI; Feminist Economics and Welfare				
		Theory				
(ii)	Unit-II	Social Choice Theory: Need for community decisions and its				
		dilemma - Axiomatic treatment of Individual preferences -				
		Different definitions of Rationality - Choice sets, Maximal sets and				
		other related mathematical concepts - importance of morality -				
		"Rational Fools" - Pareto rules and its extensions - normative				
		evaluations of the existing public choice mechanisms - Arrow's				
		impossibility and its extensions - Rights and justice - interest, well-				
(222)	Unit-III	being and advantage.				
(iii)	Unit-111	<b>Dynamic Issues in Economics:</b> Intertemporal Choice - Intertemporal Production - Overlapping Generations - Tâtonnement				
		and Learning - Introduction to chaos theory - Some economic				
		models with chaos				
(iv)	Unit-IV	Databases and Research Metrics: Indexing databases, Citation				
(11)		databases: Web of Science, Scopus etc, Impact Factor of Journal as				
		per Journal Citation Report, SNIP, SJR, IPP, Cite Score, Metrics:				
		h-index, g-index, i10index, Altmetrics

1)	T		Dh. D. Course Work
1)	Type of Course		Ph.D. Course Work
2)	Name of the Course		FINANCIAL ECONOMICS
3)	Course Code:		ECO911030
4)	Total Credit:		03 (Three)
5)	Floated by/Propose	ed by	Department of Economics and Development Studies (DEDS)
6)	Who can teach this	course	Faculty of the Department of Economics and Development Studies will teach the course.
7)	Overview		
8)	Programme/course objective		The goal of this paper is to introduce the theories and models concerning financial economics helpful for conceptualizing current issues and problems in the relevant field.
9)	Course features and learning outcome		Students acquire extensive theoretical knowledge in portfolio risk management, capital asset pricing, and the operation of financial derivatives. The course familiarises students with the terms and concepts related to financial markets and helps them comprehend business news/articles better. The course also helps to enhance a student's understanding of real life investment decisions. The course has a strong employability quotient given the relatively high demand for skilled experts in the financial sector
10)	Who can attend the	course	Ph.D. Students
11)	Course Eligi requisite	bility/Pre-	M.A. Economics
12)	Course Duration:		One Semester
13)	Course Structure		
(i)	Unit- I	Markets, Models, Interest rates, Utility Maximization, Risk: Financial Markets, Interest Rates; Models of Securities Prices; Optimal Consumption/Portfolio Strategies; Risk Pricing and Hedging of Derivative Securities: Arbitrage and Risk-Neutral Pricing; Options Pricing; Fixed-Income Market Models and Derivatives, Hedging, Bond Hedging, Numerical Models	
	Unit-II	Pricing and Hedging of Derivative Securities: Arbitrage and Risk-Neutral Pricing; Options Pricing; Fixed-Income Market Models and Derivatives, Hedging, Bond Hedging, Numerical Models	

		Equilibrium Models: Equilibrium fundamentals, CAPM,				
		Multifactor Models, Other Pure Exchange Equilibria				
(iii)	Unit-III	<b>Behavioural Finance Theory:</b> Standard Finance vs.				
(111)		Behavioural Finance, Prospect Theory and Investor				
		Psychology, Empirical Evidence.				
		<b>Theory of Financial Intermediation:</b> Financial Intermediaries				
		in the neo-classical model, Why do Financial Intermediaries				
		exist? Empirical Evidence				
		<b>Theory of the Banking Firm:</b> Objectives of a Banking Firm,				
		Theory of Deposit Contracts, Credit Risk and Risk				
		Measurement, Regulation in Banking				
(iv)	Unit-IV	Market Microstructure Theory: Trading Mechanisms and				
		the Design of Exchanges, Autocorrelation in Security Prices,				
		Sequential Models and Strategic Models, Regulation of				
		Exchanges				
12)	Text Book and References:

1)	Type of Course		Ph.D. Course Work	
2)	Name of the Course		MONETARY ECONOMICS	
3)	Course Code:		ECO911030	
4)	Total Credit:		03 (Three)	
5)	Floated by/Propose	ed by	Department of Economics and Development	
	Trouted Sy/110posed Sy		Studies (DEDS)	
6)	Who can teach this	course	Faculty of the Department of Economics and	
			Development Studies will teach the course.	
7)	Overview			
8)	Programme/course	objective	The objective of this paper is to understand the	
			monetization of exchange and its relation to the	
			technologies of production and of exchange, and the	
			relation between the nominal quantity of money and	
			aggregate economic activity.	
9)	Course features and	d learning	Taking into account to the fast development of	
	outcome		Indian financial sector and increasing role of	
			monetary policy, paper aims to generate theoretical	
			and applied understanding of monetary economics.	
10)	Who can attend the course		Ph.D. Students	
11)		bility/Pre-	M.A. Economics	
	requisite			
12)	Course Duration:		One Semester	
13)	Course Structure			
(i)	Unit- I	Tobin's	General Equilibrium Approach; Blanchard	
			on; its extension; Exchange Rate Dynamics;	
	Unit-II		nodel of Hyperinflation; Calvo-Rodriguez Model;	
<b>/***</b>			Repression; Financial Liberalization; Equilibrium	
(iii)	Unit-III	New Structuralist Literature; Dependent and Self Reliant		
		Growth with Foreign Borrowing;		
(iv)	Unit-IV		heory of Risk; Financing Vs Forgiving A Debt	
		Overhang; Market-Based Debt Reduction Scheme.

2)	Name of the Course	<u> </u>	Agricultural Economics
3)	Course Code:	<u> </u>	ECO911040
4)	Total Credit:		03 (Three)
5)			
	Floated by/Proposed by		Department of Economics and Development Studies(DEDS)
6)	Who can teach this	course	Faculty of the Department of Economics and Development Studies will teach the course.
7)	Overview		The aim of this subject is to acquaint the scholars of doctorate program with the policy and issues of agriculture sector in India.
8)	Programme/course objective		The aim of this subject to familiarise the students with the importance of agricultural economics, policies in the Indian landscape and issues
9)	Course features and learning outcome		On successful completion of the course the scholar would be able to understand how the agricultural sector of the economy works and how the issues are being resolved through policy tools. They will also be appraised about the current issues in the area.
10)	Who can attend the course		This course is suitable for Research Scholars of Economics and Development Studies.
11)	Course Eligibility/Pre-requisite		Ph.D. Students
12)	Course Duration:		One Semester
13)	Course Structure		
(i)	Unit- I	Importance of Agricultural Economics - Agriculture and Economic Development, Future Role of Agriculture, Main Feature of Indian Agriculture and Agricultural Policy, Soil Erosion, Conservation, and Sustainable Agriculture  Land Use - Land Utilization & Cropping Pattern, Forest and Social Forestry, Operational Holdings, Fragmentation and Sub Division of Holdings, Land Reforms	
(ii)	Unit-II	Policy; R Commodi Future Ma Presence Prices as processing	aral Marketing and Pricing: Agricultural Price and cole of CACP; MSP and its impact, Agricultural ity Futures and Options; Nature and Principles of arkets; Participants in Future Markets; Trading in the of Risk Aversions and Transaction Costs, Future is Forecasts; Impact of Futures Trading, Agroga as Marketing Strategy; Specificities of Agroga, Developmental Role of Agro-processing Industries,

		Selection and Evolution Options; Food Processing Policy of		
		India, 2005.		
(iii)	Unit-III	Recent Issues in India Agriculture: Mechanization in		
		Agriculture; Sources of Irrigation; Impact of Irrigation;		
		Agricultural Finance: Agency Relationship, Adverse		
		Selection, Moral Hazards and Enforcement Problem;		
		Segmented Rural Credit Markets; Resolving Information and		
		Incentive Problems; Managing Borrowers' Credit Risks,		
		Agribusiness and Trade Financing and Role of Social		
		Capital; Taxation on Agricultural Income; Role of		
		NABARD.		
(iv)	Unit-IV	Farm Management- Farm Organization, Farm Planning &		
		Budgeting, Co-operative farming		
		Political Economy of Global Agricultural Economics:		
		Protection across countries and sectors, Influence of global		
		financial and political institutions; Collective actions of		
		lobbying groups; Use of inefficient instruments and rent		
		seeking; Public investment in agricultural research and TRIPS

7)	Overview	This course is designed to introduce the role of
		infrastructure in economic growth. The broad view
		of physical as well as social infrastructure will be
		dealt in depth which will be helpful for the research
	<u> </u>	Scholars
8)	Programme/course	Course objectives
	objective	Review the existing status of infrastructure as a
		whole, and the extant polices relating to
		infrastructure development in India and other
		developing countries.
		Identify the inadequacies in different infrastructure
		sectors and the policy changes required to facilitate rapid infrastructure development.
		Discuss new methods employed in addressing issues
		particularly relating to sustainability and regulatory
		practices.
		Discuss the role of public private participation in
		financing of infrastructure.
9)	Course features and	Learning outcomes The expected learning outcome
	learning outcome	is enhanced critical and informed understanding of
	3	infrastructure development in India and other
		developing countries. At the end of the course, the
		participants would be able to
		- Critically reflect on the challenges in the
		development of sustainable infrastructure
		• Achieve a level of well-informed professional so
		that he contributes to the delivery of infrastructure
		development and management
10)	Who can attend the course	Ph.D. Students

#### **Course Curriculum**

1)	Type of Course		Ph.D. Course Work
2)	Name of the Cours	e	Research and Publications Ethics
3)	Course Code:		ECO911050
4)	Total Credit:		02 (Two)
5)	Floated by/Proposed by		Department of Economics and Development
		•	Studies(DEDS)
6)	Who can teach this	course	Faculty of the Department of Economics and
			Development Studies will teach the course.
7)	Overview		Research ethics provides researchers with the
			guidelines to conduct their research responsibly. It
			monitors and educates researchers to ensure that high
			ethical standards are kept throughout the research
			process. Generally, research ethics focuses on the
			analysis of ethical concerns that come up when people
			are involved research.
8)	Programme/course	<b>;</b>	To understand the philosophy of science and ethics,
	objective		research integrity and publication ethics. To identify
			research misconduct and predatory publications.
			To understand indexing and citation databases, open
			access publications, research metrics (citations, h-
			index, impact Factor, etc.). To understand the usage of
			plagiarism tools.
9)	Course features and		After completion of the course, students will able to
	learning outcome		learn how to be aware about the publication ethics and
			publication misconducts, understand the philosophy of
			science and ethics and research integrity, develop
			hands-on skills to identify research misconduct and
			predatory publications, differentiate indexing and
			citation databases, open access publication and research
10)	VV/l 44 1 4 l-		metrics, use plagiarism tools effectively.
10)	Who can attend the		Ph.D. Students
11)	_	oility/Pre-	M.A. Economics
12)	requisite Course Duration:		One Semester
13)	Course Structure		One beniester
(i)	Unit- I	Philosoph	y and Ethics: Introduction to Philosophy: definition,
(1)	Unit- 1		I scope, concept, branches
			efinition, moral philosophy, nature of moral judgements
		and reacti	
		and reacti	UII5.

		Scientific Conduct: Ethics with respect to science and research,
		Intellectual honest and research integrity, Scientific misconducts:
		Falsification, Fabrication, and Plagiarism (FFP), Redundant
		publications: Duplicate and overlapping publications, salami
		slicing, selective reporting and misrepresentation of data
		Publication Ethics: Publication ethics: definition, introduction and
		importance, Best practices/standards setting initiatives and
		guidelines: COPE, WAME, etc., Conflict of interest, Publication
		misconduct: definition, concept, problems that lead to unethical
		behaviour and vice versa, types. Violation of publication ethics,
		authorship and contributorship, Identification of publication
		misconduct, complaints and appeals, Predatory publishers, and
		journals
(ii)	Unit-II	Open Access Publishing: Open access publications and initiatives,
		SHERPA/RoMEO online resource to check publisher copyright &
		self-archiving policies, Software tool to identify predatory
		developed by SPPU, Journal finder/Journal suggestion tools viz.,
		JANE, Elsevier Journal Finder, Springer Journal Suggester, etc.
		Publication Misconduct: Subject specific ethical issues, FFP,
		authorship, Conflict of interest, Complaints, and appeals: examples
		and fraud from India and abroad
		Databases and Research Metrics: Indexing databases, Citation
		databases: Web of Science, Scopus etc, Impact Factor of Journal as
		per Journal Citation Report, SNIP, SJR, IPP, Cite Score, Metrics:
